Objectives

REBORN unlocks seagrass restoration at scale (>1 ha) in NWE for biodiversity and natural capital gains by simultaneously driving seagrass-related governance, practice and capacity-building to: Drive long-term seagrass restoration governance and policy change in NWE through a multi-actor community of >30 organisations; Test a novel restoration model in ~15 ha in collaboration with 250 community members and facilitate its uptake to up to 50,000 ha across NWE; Increase the capacity of 40 organisations (practitioners, community members, businesses, policy makers) as seagrass restoration ambassadors through tailored capacity building modules.
